### Short Courses in Quality Program Management

Thirteen offerings for 1976-1977 of six different short courses in Quality Program Management are detailed in a brochure available from the Education and Training Institute of the American Society for Quality Control. Courses offered are: Quality Engineering, Managing for Quality, Probability and Statistics for Engineers and Scientists, Management of the Inspection Function, Quality Audit—Development and Administration, and Management of Quality Costs. Applicable to all business and industry, some of the courses this year are being offered in several states; and all provide Continuing Education Units upon successful completion. The 12-page brochure is free from the ETI REGISTRAR, American Society for Quality Control, 161 W. Wisconsin Ave., Milwaukee, Wis. 53203. (414) 272-8575.
